UPDATEING THE FIRMWARE

The version of your GL200/GL200A's firmware can be updated by rewriting the flash ROM on the pertinent circuit boards. You can update the firmware by loading the update program to a USB memory device.

How to Update the GL200/A Flash ROM from the USB memory device

Preparations for the update

Firmware : Mxxxa001.G20 ← Main Program file for GL200/GL200A

 : Mxxxa002.G20 ← Main Program file for GL200/GL200A

Note:
The former firmware version of 2.00 are for the GL200.
The firmware version from 2.00 is for the GL200A.

(1) Connect the AC adapter for the GL200/GL200A.

(2) Turn on the GL200/GL200A.

(3) Copy the two main program files to a USB memory device from the computer.

How to update

(1) Insert the USB memory device containing the main update program into the GL200/GL200A's USB port.

(2) Turn on the GL200/GL200A to automatically execute the update program.

(3) Wait until the display shown below appears or until the beeper sound stops.

Note:
Don't turn off the GL200/GL200A until this process is finished.

GL200/GL200A

The following message will appear on the GL200/GL200A display in yellow characters when the upgrade is complete. Also the beeper will sound for 5 seconds.

"Please Turn Off the Power.   I have locked up."

(4) Turn off the power to the GL200/GL200A when the above message is displayed or when the beeper sound stops.

(5) Delete the two main program files from the USB memory device.
This is to avoid upgrading the firmware by mistake.
